

Managed WiFi

Seamless and consistent Wi-Fi that's expertly managed. Simple, Fast & Reliable.

Seamless Connectivity

Eliminate dead spots, service consistency at every corner.

Expertly Managed

Round-the-clock proactive monitoring and rapid response

Fiber Performance

Future-proof and advanced infrastructure with Fiber-to-the-room (FTTR) Technology

Convenience w/o CAPEX

You can focus on growth by shifting from CAPEX to OPEX

What is Converge Managed WiFi?

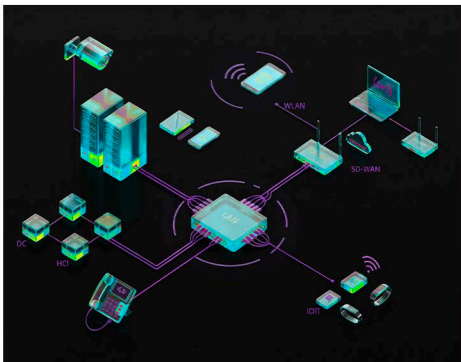

Converge Managed WiFi is a business solution that essentially allows Wi-Fi to be managed as a service. It gives a high-speed wireless solution for businesses that need seamless connectivity without the effort of managing an IT team. With Fiber-to-the-Room (FTTR) and Passive Optical LAN (POL) technology, it ensures uninterrupted internet, superior performance, and easy scalability – no need for major infrastructure upgrades!

Benefits

Resource Allocation

Operational Efficiency

Reliable & Experienced Network Provider

Network Infrastructure

- Routers & Switches
- Wireless Network
- FTTx
- SD-WAN

Data Center Infrastructure

- Servers
- Storage
- Virtualization
- HCI

Peripheral Infrastructure

- IP Telephony
- Intelligent Surveillance
- IoT Integration

Cybersecurity

- Next-Generation Firewall
- Endpoint Security
- Security Services
- Managed SOC
