Bifrost Cable System

Model:
Open Access
Submarine Cable

- Capacity Available for Selling:
- ½ or ¼ fiber pair spectrum on an IRU basis
 - Nx100G on IRU or Lease Basis
 - Option for higher capacity size can be considered based on feasibility study

Design Capacity:
15 Tbps

- Converge Fiber Pair Landing Locations:
- Singapore – Tuas
 - Philippines – Davao
 - Guam – Alupang
 - US – San Luis Obispo, CA / Winema OR

- Cable System Number of Fiber Pairs:
- Singapore to US – 12 fiber pairs
 - Philippines (PH) Branch – 10 fiber pairs

- Landing Party / CLS Provider:
- Tuas, Singapore – Keppel / Keppel
 - Indonesia – Telin / Telin
 - Davao, Philippines – Converge / Converge
 - Alupang, Guam – Meta / GTA
 - San Luis Obispo, CA – Meta / PCL
 - Winema, OR – AWS / Astound

- Estimated Latency:
- Singapore – Guam : 64 ms
 - Singapore – Grover Beach, CA : 165 ms
 - Davao – Singapore : 41 ms
 - Davao – Guam : 27 ms
 - Davao – Grover Beach, CA : 128 ms

Supply and Installation Works Provider:
Alcatel Submarine Networks (ASN)

SEA-H2X

Model:
Open Access
Submarine Cable

- Capacity Available for Selling:
- ½ or ¼ fiber pair spectrum on an IRU basis
 - Nx100G on IRU or Lease Basis
 - Option for higher capacity size and 1 FP can be considered based on feasibility study

Design Capacity:
20 Tbps

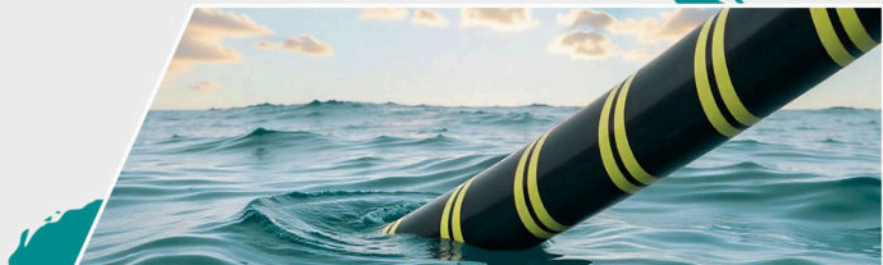

- Converge Fiber Pair Landing Locations:
- Singapore – Tuas
 - Philippines – La Union
 - Hongkong – Tseung Kwan O

- Cable System Number of Fiber Pairs:
- Singapore to Hongkong – 8 fiber pairs
 - Philippines (PH) Branch – 8 fiber pairs

- Landing Party / CLS Provider:
- Tuas, Singapore – China Mobile
 - Kuching, Malaysia – IRIX or as designated by AP SEA-H2X
 - Songkhla, Thailand – China Mobile
 - La Union, Philippines – Converge ICT
 - Hainan Lingshui, China – China Mobile
 - Tseung Kwan O, Hongkong – China Mobile

- Estimated Latency:
- Singapore to Hongkong : 34 ms
 - Philippines to Hongkong : 13 ms
 - Philippines to Singapore : 30 ms

Supply and Installation Works Provider:
HMN Tech
